

YOUR EXPERT  
IN ALTERNATIVE FUELS

# In-house Alternative Fuels Workshops

Pave the way to make your  
alternative fuels project a success

Stay up to date in current best  
practice technologies

Choose the most efficient and  
economical way to prepare your  
team for your alternative fuels  
project

... with MVW Lechtenberg  
& Partner's in-house workshops!

## Your advantages:

- Solely internal audience
- Presentations prepared on the basis of plant-specific information
- Beneficial and open discussions
- Small working groups
- Preparation of a presentation for public stakeholders (e.g. municipalities) optional

**Our in-house workshops provide essential information tailored to the individual requirements at your plant.\***

LECHTENBERG & PARTNER

# In-house Alternative Fuels Workshops

The workshop covers all essential topics needed for successful alternative fuel projects, such as:

## Country-specific Alternative Fuels Overview

What types of alternative fuels are already used in your country?  
What types of alternative fuels are available?  
Current guidelines for the cement industry

## Economics

Economic feasibility  
How to calculate and finance an alternative fuels project  
CDM/JI Carbon Credits

## Waste Assessment

Waste evaluation  
Sampling & sample preparation  
Analyses of biogenic content  
Waste sourcing and contracting

## Permitting Issues

Environmental impact assessment  
Notification and transfrontier shipments of RDF  
Logistics & permitting – RDF transport  
Emission monitoring  
Public information

## Kiln Impact

Major impacts on the kiln  
Fan capacities  
Refractories  
Chlorine and sulphur  
Humidity

## Quality Management of Alternative Fuels

Contaminant sources in alternative fuels  
Sample preparation  
Monitoring and reporting

## RDF Technologies

Separation  
Screening  
Air classification  
Optical sorting systems  
Shredding  
Storage  
Dosing & feeding

Take this opportunity to get your team ready for correct handling of alternative fuels in order to achieve smooth plant operation!

\*The programme can be adjusted with further topics according to your specific requirements. Additional process data from your plant will be needed.
